PROFESSIONAL EXPERIENCE

Senior Software Engineer | Nethues Technologies (P) Ltd. | 2022 – Present

Developing and maintaining web applications, business platforms, CRM systems, e-commerce solutions, APIs, and AI-powered products.

- Develop and maintain full-stack applications using PHP, Laravel, Python, JavaScript, Vue.js, React, and related technologies.
- Build and integrate REST APIs and third-party services.
- Work on AI-powered applications, including chatbots, knowledge assistants, product assistants, and AI search.
- Develop and enhance custom CRM and business platforms based on real operational workflows.
- Design and maintain MySQL and PostgreSQL database solutions.
- Work with Docker, Linux-based environments, deployment, production support, and ongoing application improvements.
- Implement new features, troubleshoot issues, and improve existing production systems.

PHP Developer | Ayurs Infotech | 2021 – 2022

- Developed and enhanced PHP-based and database-driven web applications.
- Worked on feature development, bug fixing, MySQL functionality, and application improvements.
- Contributed to attendance management functionality and other business application features.
- Worked on API integrations and web tracking implementations, including Meta Pixel.
- Built experience understanding client requirements and maintaining existing applications.

SELECTED PROJECTS

AI Chatbot & Knowledge Assistant

AI-powered assistant designed to help users retrieve relevant information through natural conversations using business knowledge, product data, website content, and documents. Worked across backend APIs, AI retrieval, search, administration, and integrations.

Technologies: Python, FastAPI, React, PostgreSQL, Qdrant, AI APIs, Docker

AI Product Assistant

AI-powered product discovery experience that helps users search and explore relevant products through natural language and product catalog data.

Technologies: AI Search, Product Data, APIs, Vector Search, Web Development

Custom CRM & Business Platforms

Developed and enhanced applications for managing customers, projects, teams, workflows, reporting, and business-specific processes.

Technologies: Laravel, PHP, MySQL, PostgreSQL, Vue.js, React, REST APIs
